

# Argus Metals Global Scrap

**Argus Metal Prices** provides comprehensive and detailed coverage of the global scrap markets available in a single product with over 1000+ scrap price assessments. Covering ferrous and non-ferrous markets alongside 30-minute delay exchange data and robust analytical tools on the Argus Metals platform, there is no better resource for identifying opportunities to maximize profits and benefit from regional arbitrage opportunities than within the flagship Argus Metal Prices product. Additionally, prices for iron ore, scrap substitutes and finished steel products provide a holistic view of the markets and facilitate easy detection of competitive material advantages or correlations with finished good prices.

# North American Scrap Assessments

Argus publishes weekly US Midwest, Southeast and Eastern indexes for ferrous scrap and assesses more markets than any other provider.

The product is structured to align with current trading patterns and covers regional domestic transactions as well as export market transactions.

- 8 containerised scrap price locations
- 14 consumer buying price locations, including US and Canada
- 8 export yard buying price locations
- 4 dealer selling price locations

## Argus North American Ferrous Coverage

### Main Grades Assessed:

- #1 busheling
- Shredded
- Shedder feed (export yards)
- #1 HMS
- 5' P&S
- Machine shop turnings

### Monthly:

Delivered consumer buying prices, with 5-7 years of price history in most markets

### Weekly:

Bulk and containerised assessments, including freight, as well as export yard buying prices, with two years of price history

## Additional North American Coverage

Argus North American stainless and titanium scrap prices are widely used in contracts within various supply chains and the Alloy Calculator provides a tool to create synthetic prices for over 200 predefined alloys as well as functionality to develop a price based on the intrinsic value of user-defined custom alloys and scrap.

Argus Metals also covers non-ferrous grades of scrap including tweak, twitch, and zorba in the US market and offers dealer grade assessments for more grades of non-ferrous scrap products than any other provider in the US market.

For today's highly engineered materials, Argus provides a comprehensive collection of input costs and pairs them with a flexible and customisable platform enabling sophisticated cost-modelling and scrap valuation calculations based on your specific commercial needs.

- Zorba prices for US domestic and export (east and west coast)
- 17 US domestic and 2 Canadian dealer markets
- 8 Titanium scrap prices delivered US processor
- US Hot-Rolled Coil Price with weekly Tuesday assessment
- Cupro-nickel, Monel, superalloys, Hastelloy (C & X), 5 Inconel grades, Waspaloy and Invar solids

## European and Asian Coverage

Argus Metal Prices contains over 50 European prices assessments including:

- German domestic ferrous scrap
- Spanish domestic ferrous scrap
- Spanish imported scrap
- UK domestic ferrous scrap
- Russia including St. Petersburg dockside

Argus Metal Prices provides context and intelligence to these European domestic markets to help steel mills, scrap suppliers, buyers and industrial manufacturers to gain a greater understanding of the markets in which they operate.

**Main Grades Assessed:** E1, E2, E3, E40, E5, E8, HMS 1/2, A3, A3B, OA P&S, 3B Shred, 4A/4C New Steel Bales

**Monthly:** Delivered to consumer buying prices, including assessments for four separate German regions

**Weekly:** Export yard price and freight rate assessments for major exporting regions including the main European suppliers of scrap to the Turkish market

## Additional Europe and Asia Coverage

With the broadest set of domestic and import scrap prices covering the European markets, Argus captures the spot market surrounding the major steel producing regions in Europe.

- 7 consumer buying price locations, including Germany, Spain, UK and Russia
- 4 export yard buying price locations
- 3 import price locations
- 2 export selling price locations

Argus carries Asian prices in a variety of mature scrap-generating markets as well as analysing deep sea trades and short-sea trades. Recognising the global nature of many steel feedstocks purchased by mills across the world, Argus covers the full scope of steel mill purchasing activity for EAF production including stainless and engineered steels.

- Taiwan imported ferrous scrap
- India imported ferrous scrap
- Pakistan imported ferrous scrap
- Bangladesh imported ferrous scrap
- China, South Korea, Taiwan, Japan imported aluminium scrap
- China, South Korea, Taiwan, Japan imported copper scrap

Argus assessments are used as the reference price in physical supply and derivative contracts in commodity markets across the globe. Argus' methodology is proven, robust, and created for the current modern landscape of the metals industry. With a large, dedicated global team of experts, including the deepest bench of dedicated scrap reporters of anyone assessing the scrap markets, we are committed to ensuring the highest quality in price assessments while delivering actionable market news and commentary.

In addition to Argus Metal Prices, we also offer Argus Metals International and Argus Ferrous Markets:

**Argus Ferrous Markets**

Formerly Argus Steel Feedstocks, this service provides the most accurate, and unbiased pricing, including over 150 price assessments from global ferrous markets, including coking coal, iron ore, ferrous scrap, steel and relevant freight rates. Access to exchange data from LME (London Metal Exchange), CME (COMEX and NYMEX), and SHFE (Shanghai Futures Exchange) are also available as a standard part of the service.

**Argus Metals International**

This service provides the latest accurate, unbiased pricing, including over 700 price assessments from global non-ferrous markets, including minor metals, rare earths, ferro-alloys, base metals and non-ferrous scrap. It also offers indexation-standard assessments used and trusted in non-ferrous markets around the world, including minor metals, base metals premiums, ferro-alloys and rare earth elements. Access to exchange data from LME (London Metal Exchange), CME (COMEX and NYMEX), and SHFE (Shanghai Futures Exchange) are also available as a standard part of the service.
