

Argus Agriculture Package

Agricultural markets entered uncharted territories at the start of the war in Ukraine, which cast profound uncertainties over a major supply region and brought unprecedented volatility to the market, causing traditional grains, oilseeds and vegoils trade routes to be redrawn. Our unique insights and data help our customers **navigate these fast-evolving market conditions** via concise formats (20-minute webinar) and dashboards that can be entirely customised to fit a variety of information needs. The AgriMarkets + Argus Agritel Outlook package combines the granularity of Argus Agritel daily market and trade flow analysis with a bird's eye view of the markets, including price discovery, supply and demand forecasts, fundamentals data downloads, and proprietary crop analysis.

Argus AgriMarkets

Agritel expertise and Argus know-how combined to offer **essential market intelligence, forward-looking analysis, fundamentals data, price discovery and news** for the grains, oilseeds and vegoils markets via a daily PDF report and fully customisable data dashboards with charting tools. The product includes a wide range of fundamentals datasets which are available for download. New datasets are added regularly.

HELPS YOU AND YOUR COMPANY

- Navigate turbulent markets
- Guide position taking
- Manage risk
- Protect margins
- Identify most competitive origins
- Planning and decision-making
- Visibility on opaque markets
- Monitor competing producing regions
- Access hard-to-find data

Argus Agritel Outlook

The Agritel view on recent developments, forward-looking analysis and proprietary supply/demand forecasts for the grains, oilseeds and vegoils markets.

Topics include: **market analysis, crop analysis, planting decisions, weather impact on crops, price correlations, etc.**

Comprises of: a weekly webinar and slide deck, S&D forecasts available for download, and a monthly forecast/thought leadership report ahead of the USDA's Wasde report.

HELPS YOU AND YOUR COMPANY

- Enable effective planning
- Build trading outlooks
