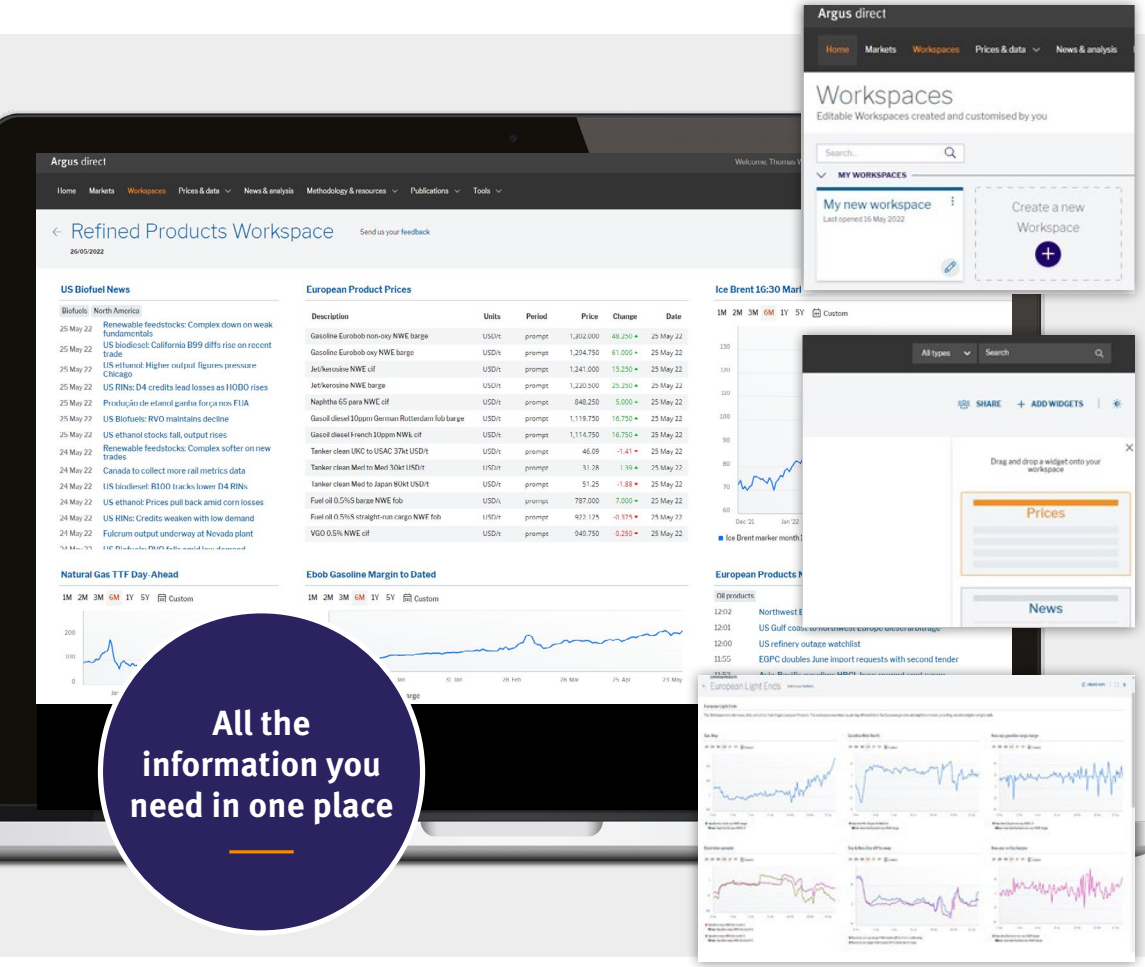
Argus Workspaces

The new functionality that provides an elegant way to capture information from different sectors by customising your data suite.



Customise your workspace

Creating a workspace is extremely easy. Start with a new template and populate it with datasets tailored to your needs. Alternatively, you can replicate and edit existing templates with the ability to modify key information.

Add Widgets

The workspace widgets allow you to refine and streamline prices, news, and charts within a single view. Simply click and drag the widget to wherever you want it on your worksheet.

Price charts

The workspace widgets allow you to refine and Set up prices using the search tab to select the prices you need and customise the view that suits you. Add as many elements as you need across the screen for an enhanced view.

Benefits

Have control over what information goes into your workspace template and easily share this with your team

Track news on specific areas, companies, geographies and more, giving you the right insights to confidently make well-rounded decisions

Get updates about new price launches and other services, so you have a full view across the supply chain

Store large numbers of ready-made charts and explore relationships between prices for an immersive experience

Merge and capture relevant information quickly and efficiently.
