# Consulting Services: Argus Biofuels Outlook

Stay ahead of the curve with the Argus Biofuels Outlook service — a monthly service forecasting demand and prices for environmental credits, renewables, and key biofuels, including biodiesel, renewable diesel and HVO, ethanol, sustainable aviation fuel (SAF) and renewable feedstocks, up to 15-months into the future.

With accompanying expert analysis of key trends in each market, the Argus Biofuels Outlook service is your independent source of intelligence to aid planning and decision making.

## Markets covered

- European biodiesel
- European HVO & SAF
- European Ethanol
- European crop & waste-based feedstocks
- US Ethanol
- US renewable diesel & SAF
- US renewable feedstocks
- US biodiesel
- US RINs/RVO
- Low carbon fuel standards (LCFS)
- Asia-Pacific biodiesel, HVO and SAF
- Asia-Pacific biofuel and feedstock trade

## Key features and benefits

- Up to 15-month forecast of key regional biofuel price assessments, including ethanol, biodiesel, renewable diesel/HVO, SAF
- Country and feedstock-level demand forecasts for North America and Europe
- Summary of key regulatory changes impacting biofuels supply and demand factors
- Price outlook for key environmental credit markets, including LCFS and RINs
- Improves ability to forecast cost and revenue streams for renewable feedstocks, HVO and SAF Independent and transparent market analytics
- Improve your planning, budgeting and decision making
- Understand market movements through independent analytical commentaries
- Get trusted, expert insights, drawing on Argus' daily biofuels market reporting expertise
- Coverage of key fundamentals for gasoline, diesel, jet fuel, and agricultural factors that impact the biofuels markets

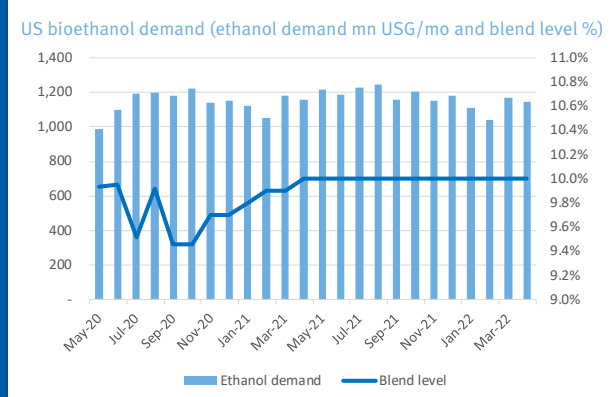

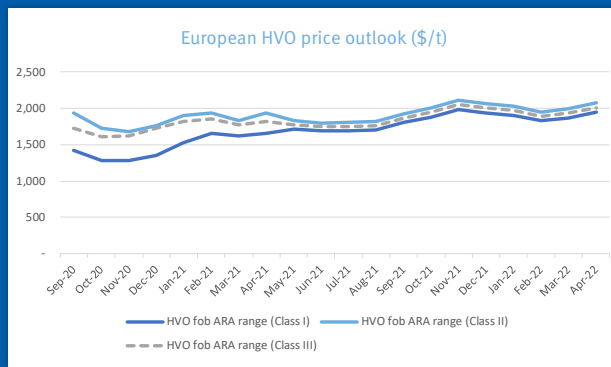

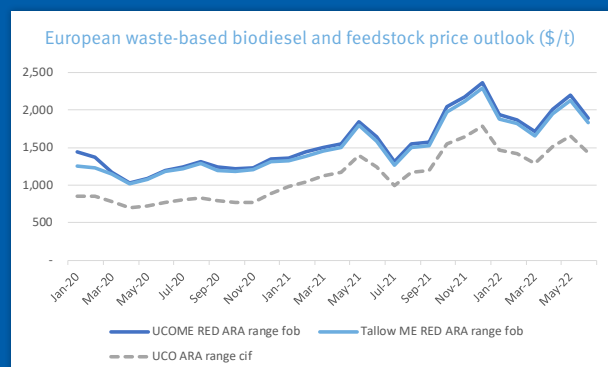

## Customers that benefit

- **Traders** – use price forecasts to track biofuels refining margins and inform on arbitrage opportunities.
- **Bankers & Investors** – key insights and analysis can help make better decisions when analyzing companies that are getting into the biofuels marketplace.
- **Plant operators** – key price signals that support planning, production, maintenance plans and inventory allocation decisions.
- **Government agencies** – rely on our outlook as a key part of a holistic view of the biofuels market.
- **Biorefiners** – determine which feedstocks you can run most profitably in the years ahead, and how your plant economics will shape up in the medium-term.
- **Consumers** – get guidance to better analyze sustainability and environmental, social and governance goals.

## What it looks like

Here is a sample of data sets you will get in the Argus Biofuels Outlook.
