Argus Biofuels Consulting

Tailored services for clients seeking deep insights into the biofuels industry

Argus Consulting Services

Argus will be your partner in navigating the challenges and opportunities with our bespoke consulting services and research.

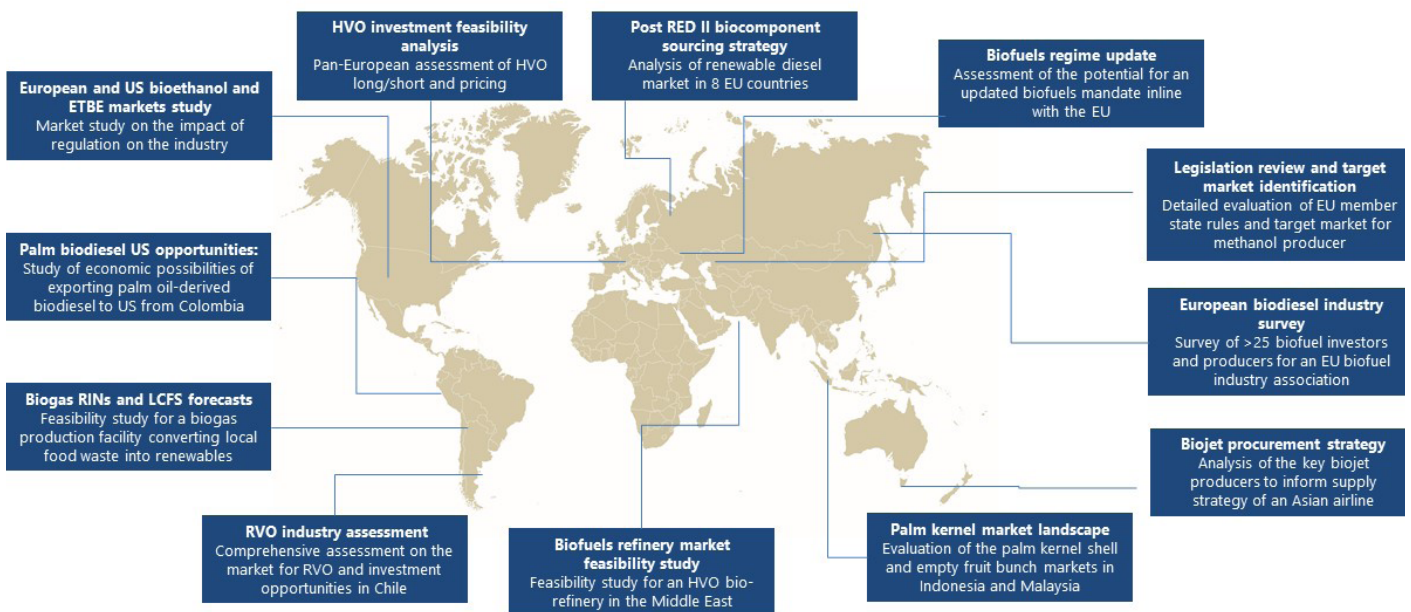

Our global team works with corporates, lenders and investors, governments and regulatory bodies as well as professional service firms.

We provide global fundamentals data and analytical tools, strategy reports and price outlooks which are used in bespoke projects for clients.

Services Offered

- Feasibility Studies
- Project Valuation
- Due Dilligence
- Strategic Planning
- Policies and Regular Analysis
- Market Entry Studies
- Market Supply Strategy
- Price and Fundamentals Forecast

Here is a glimpse of our global biofuels project experience.

Case Studies

Biofuels Refinery Market Feasibility Study

Client Request

The client, a refiner based in the Middle East, was examining the feasibility of building a bio-refinery in the region to produce hydro-treated vegetable oil (HVO). Green products from the facility would be marketed to European and US markets, and these would include renewable biodiesel, jet fuel, LPG and naphtha. The client approached Argus to assist with the market study portion of the wider feasibility study.

Results Delivered

Argus Consulting provided a written report and an Excel document, which delivered the price forecasts, the methodology behind them, and the discussion of market dynamics.

HVO feedstock and product analysis

Client Request

The client, a Middle Eastern oil company, was reviewing its long-term strategy and approach to meeting obligations under European renewable fuels blending mandates. The client was assessing the viability of a potential offtake agreement with an HVO production facility, and wanted to understand the pricing basis and supply-demand outlook for a range of feedstocks and biocomponents.

Results Delivered

The study, presented in PowerPoint, provided a complex and detailed assessment of renewable diesel and other biofuel markets in western Europe, indicating the current and future European net long and short HVO position. Supply-demand analysis, together with a feedstock and product pricing forecast, provided the client with solid assistance regarding an economic valuation of the potential offtake agreement. An additional workshop was held to present the findings to a wider audience.

Market Due Diligence Advisory for a Bio-Ethanol Production Facility in Oceania

Client Request

The client was considering developing a fully integrated, energy self-sufficient bio-ethanol production facility in Oceania. The client approached Argus Consulting Services, to access its deep knowledge of the Asia-Pacific and US biofuels markets in particular, and the transportation fuels market in general, seeking advice as to the viability of this project.

Results Delivered

Argus delivered written report communicating the findings to the client.

Market analysis of liquid biofuels: Prices, price projections and a discussion of market dynamics

Client Request

The client, a Norwegian governmental agency, engaged Argus Consulting to provide price forecasts for around 20 biofuel types until 2030. Types included green diesel, bio-gasoline and the bio equivalents of LPG, naphtha, jet fuel, and HFO. The client also sought to understand market dynamics and the underlying drivers for pricing biofuels.

Results Delivered

Argus Consulting provided a written report and an Excel document, which delivered the price forecasts, the methodology behind them, and the discussion of market dynamics which delivered the price forecasts, the methodology behind them, and the discussion of market dynamics.

Renewable Volume Obligation (RVO) Industry Guide

Client Request

Our client is a South American diversified mining company. To support its operations, the client consumes diesel and has recently discovered a discount in one of its pricing formulas. The discount is tied to renewable diesel fuel that originates in the US and is subject to a legislative obligation known as the Renewable Volume Obligation (RVO). Our client commissioned Argus to provide a comprehensive study on the RVO market.

Results Delivered

Argus delivered a comprehensive report that outlined the existing RVO market and an assessment of expectations of how it will change in the future.
